# Insulation Comparison

## **Down:**

Providing the best warmth to weight ratio of all insulation types. Delivering lofty, packable warmth, perfect for drier conditions

## **Blown Synthetic:**

Versatile and resilient; providing baffled insulation at a slightly lower warmth to weight ratio than down whilst delivering great performance at commercial price points.

## **Sheet Synthetic:**

Reliable insulation even when wet; either designed for static warmth or active insulation, these products can be protective, versatile, and adaptive.

# PRIMALOFT® SILVER INSULATION RISE

AS WELL AS PROVIDING A NEW AESTHETIC, WE  
ARE UPDATING TO A NEW INSULATION IN ALL  
OUR SYNTHETIC BAFFLE JACKETS, SWITCHING  
TO PRIMALOFT® SILVER INSULATION RISE  
TECHNOLOGY.

PrimaLoft® RISE insulation provides impressive thermal values at low weights and thicknesses, creating a sleek style and lightweight performance.

Made using 100% post-consumer recycled material, PrimaLoft® Silver Insulation RISE provides thermal values comparable to high-quality natural down.

With enhanced wash durability, PrimaLoft® Silver Insulation RISE provides a resilient alternative to down at a more accessible price point.

Insulation

PrimaLoft

# PRIMALOFT® THERMOPLUME®+

ThermoPlume®+

WE ARE PLEASED TO BE ONE OF THE MAIN  
LAUNCH PARTNERS FOR THE ALL NEW PRIMALOFT®  
THERMOPLUME®+. HIGHLIGHTED WITHIN THE  
NEW CIRRUS ULTRA JACKET AS OUR PINNACLE  
TECHNOLOGY IN LOOSE FILL SYNTHETIC  
INSULATION.

Made from 100% post-consumer recycled material, it has a patent-pending ThermoPlume® structure that utilises fibre balls and plumes to create an insulation that's soft, feather-like, and mimics the feel and fluidity of down.

The synthetic fibre balls work in tandem with the plumes to form a unified structure that creates a scaffolding effect, delivering a resilient loft that resists clumping, even after washing.

ThermoPlume®+ requires 16% less fill than PrimaLoft® Silver RISE insulation to create the same loft.

 Rab®

QIP-21 / QIP-22

# CIRRUS ULTRA HOODY

## The Sales Pitch:

This is the lightest and warmest loose fill synthetic jacket we've ever made, closely mimicking the lofting properties of down, while expertly dealing with damp, cold weather.

Armed with our heat-reflective TILT technology and new PrimaLoft® ThermoPlume®+ insulation, it's as warm as our Electron Pro down jacket and offers instant comfort in any conditions.

Incorporating groundbreaking technology and premium materials, the Cirrus Ultra was born from pushing the boundaries of what it's possible to achieve with synthetic insulation.

A key halo piece, it demonstrates the cutting-edge developments in our synthetic collection to drive interest in the range as a whole.

## The ultimate synthetic piece for all-mountain adventure

### FEATURES / BENEFITS:

TRANSITION FROM HIKE TO CLIMB WITH THE LOW-BULK, HELMET-COMPATIBLE HOOD

STRATEGICALLY PLACED SHEET INSULATION WITHSTANDS MOISTURE AND PACK ABRASION

STOW AWAY EASILY IN THE INTEGRATED STORAGE POCKET WITH PRINTED CALL OUT

STAY WARM EVEN IN THE WET THANKS TO RESILIENT PRIMALOFT® THERMOPLUME®+

WATER-RESISTANT PERTEX® QUANTUM PRO FABRIC HELPS DEFLECT THE ELEMENTS

TRAP WARMTH WITH HEAT-REFLECTIVE TILT

QIP-23 / QIP-24

# NEBULA PRO JACKET

## The Sales Pitch:

Reimagined with new loose fill PrimaLoft® Silver RISE insulation offering a 35% better warmth-to-weight ratio than the previous PrimaLoft® Silver Insulation Luxe™, our original hardwearing synthetic jacket is now warmer than ever, with greater resilience in cold, damp conditions.

Sharing fabric and insulation with our updated Cirrus range yet burlier and more protective, the Nebula Pro is designed to offer the same fuss-free warmth, but for winter use.

It has a simple design and entry-level price point that will appeal to aspiring mountaineers who might feel daunted by a more technical aesthetic. Reengineered to reduce the price and increase margins, it's a key piece within our new synthetic range architecture.

# No-nonsense, mountain- ready insulation

## FEATURES / BENEFITS:

NEW, LOFTIER PRIMALOFT® SILVER RISE INSULATION HAS 35% BETTER WARMTH FOR WEIGHT THAN PRIMALOFT® SILVER INSULATION LUXE™

INSULATION RESISTS CLUMPING AND RECOVERS QUICKER IN DAMP MOUNTAIN CONDITIONS

WE'VE REMOVED ZONED SHEET INSULATION TO GIVE A MORE UNIFORM LOOK WITH A WIDER APPEAL

STASHES EASILY INTO THE INTEGRATED STORAGE POCKET WITH PRINTED CALL OUT

QIP-25 / QIP-26

# CIRRUS ALPINE JACKET

## The Sales Pitch:

We've taken our classic baffled, loose fill synthetic jacket, and cranked up the heat with 25% larger baffles to accommodate the new higher lofting PrimaLoft® Silver RISE insulation.

With a 35% better warmth-to-weight ratio than PrimaLoft® Silver Insulation Luxe™, this new insulation makes the jacket perceptively warmer than our previous model.

With an updated aesthetic and improved fit accommodating a wider range of body shapes, it's perfect for year-round alpine use, whether as a layer in winter or outer in the warmer months.

A staple in our ever-popular Cirrus range that responds to a continuing demand for micro-baffle jackets, the Cirrus Alpine offers users go-to synthetic insulation at an accessible price point.

## Our mountain all-rounder, refreshed

## FEATURES / BENEFITS:

UNRESTRICTED HEAD TURN WITH THE IMPROVED HOOD FIT

FULLY FEATURED, HIGH SPEC JACKET FOR MORE TECHNICAL BRAND POSITIONING AT AN ACCESSIBLE PRICE POINT

MORE WARMTH WITH 25% INCREASED BAFFLE HEIGHT ACCOMMODATING BETTER LOFTING INSULATION

NO NEED FOR A STUFF SACK THANKS TO THE INTEGRATED STORAGE POCKET

QIP-31 / QIP-32

# CIRRUS FLEX HOODY

## The Sales Pitch:

The lightest and most packable member of the Cirrus family has been given a refresh, with an improved fit and 33% larger baffles allowing the insulation to loft more and provide added warmth in cold conditions.

This season we've updated the technology and improved performance across our whole Cirrus range, incorporating new high-lofting PrimaLoft® Silver RISE insulation which has a 35% better warmth-to-weight ratio than the previous PrimaLoft® Silver Insulation Luxe™, and is better able to retain heat and recover quickly in damp weather.

The result is a jacket that offers the superb mobility and layering potential of the original, with the optimised warmth needed for all-season use.

## Low-bulk, year-round warmth

# EVOLUTE HOODY

## The Sales Pitch:

Challenging ascents in intermittent weather call for an adaptable, hardworking midlayer that will manage your output, even when you're adding and removing outer layers.

Delivering the moisture control and temperature regulation you need when you're working your hardest, this is our most breathable, wicking active insulation which works at the core of your layering system to keep you comfortable and sweat-free.

Incorporating new technologies that push the limits of fleece performance, the Evolute stands at the forefront of the exciting developments we're making in our midlayer category.

It's a highly technical halo piece that allows us to re-present our fleece collection and drive sales across the range.

# The midlayer made to keep you moving in variable conditions

## FEATURES / BENEFITS:

.....  
SWEAT MOVES FROM THE INSIDE OUT  
THANKS TO THE  
HIGH-WICKING FABRICS

.....  
TRAP WARM AIR IN THE COSY,

.....  
WE'VE CUT LOOSE FABRIC BY SEAMING  
THE LAYERS TOGETHER IN STRATEGIC  
AREAS

# PRIMALOFT® EVOLVE®

## A NEW EVOLUTION

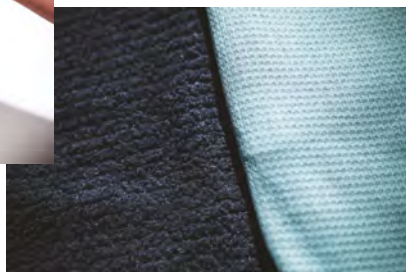

YOUR LAYERING SYSTEM IS ONLY AS GOOD AS ITS LAYERS. SO WE'RE GIVING THE HUMBLE MIDLAYER AN EVOLUTION IN PERFORMANCE FOR AW24, WITH THE INTRODUCTION OF OUR NEW EVOLUTE STYLES.

Crafted from PrimaLoft® Active Evolve, these midlayers are the perfect active insulation for activities with fluctuating pace and intensity.

PrimaLoft® Active Evolve is engineered to insulate you while allowing water vapour to pass through.

Designed to perform across a broad temperature range, it works by biomimicking natural animal fur. It uses lofted polyester fibres in a densely packed underlayer to create a barrier, which traps body heat and regulates your temperature in cold and warm climates. "Guard hairs", the more oily, water-repellent exterior found in animal fur, have also been simulated.

Active Evolve fibres are constructed in different deniers and lengths, creating natural highs and lows inside the loft. The coarser high-denier fibres trap air, insulate, and offer resilience, while the softer, finer fibres provide enhanced warmth, protection, and packability.

QFG-15 / QFG-16

# MODULUS HOODY

## The Sales Pitch:

Bring warmth, wicking, and unhindered mobility to your all-mountain layering system with this high-performance fleece midlayer.

With a slim yet unrestrictive fit that won't hold you back as you make vertical progress, it's a staple for hiking and climbing in cold winter conditions.

The Modulus Hoody combines the fast-drying, high-wicking properties of a technical fleece with superb softness and comfort. Built with Thermic™ Stretch Pro, our durable faced fleece fabric used in some of our warmest bibs and tights, it resists abrasion and pilling over long periods of use.

Offering exceptional stretch and recovery, it's ideal for environments where warmth, moisture control, and a full range of movement are crucial. With a premium feel, the Modulus Hoody is positioned at the higher end of our Mountain collection yet has an attainable price point for a wide audience.

# Our Collections

Through clever use of colour and positioning, our collections can be used to equip mountain people taking on any activity in any weather.

By identifying contemporary looks we can design and deliver the right products for global audiences and international sales.

# KHROMA CONVERGE JACKET

## The Sales Pitch:

A versatile jacket that will take you from untracked slopes to the summit and everywhere in between, this 3-layer GORE-TEX ski shell offers all-mountain protection.

It provides next-level comfort with warm backer technology, which wicks away moisture to keep you dry, warm, and cosy in deep winter temperatures.

Designed to offer a premium, high-performing jacket at a commercial price point, the Khroma Converge Jacket is geared up for tackling powder descents, steep big mountain lines, and technical terrain. Yet it's also equipped with our core set of backcountry features to keep you comfortable on uphill climbs, such as the strategically placed chest pockets and pit zips that combine to allow through-venting.

With a fluorocarbon-free GORE-TEX ePE membrane and versatile feature set, it's a potential door opener allowing us to introduce a wider audience to the Khroma range.

# Comfort and protection wherever you're making tracks

## FEATURES / BENEFITS:

STAY COMFORTABLE AND STAVE OFF THE COLD WITH WARM BACKER TECHNOLOGY

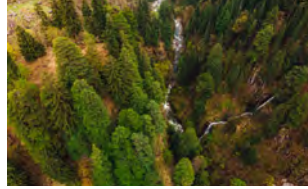

SHUT OUT WIND AND SPINDRIFT WITH THE REMOVABLE SNOW SKIRT

INNOVATIVE NEW GORE-TEX MEMBRANE IS FLUOROCARBON-FREE

BELLOUED HARNESS- AND PACK-COMPATIBLE POCKETS ARE LOW PROFILE YET HIGH VOLUME

DITCH HEAT QUICK ON THE CLIMB WITH THE THROUGH-VENTING SYSTEM

**Khroma**  
GORE ePE

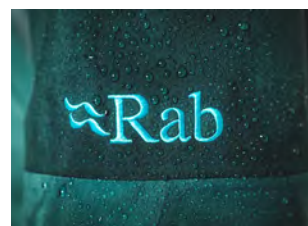

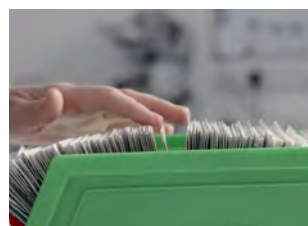

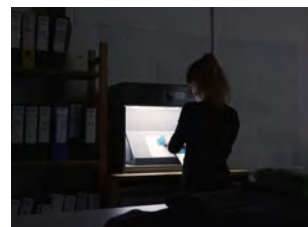

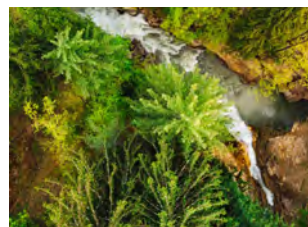

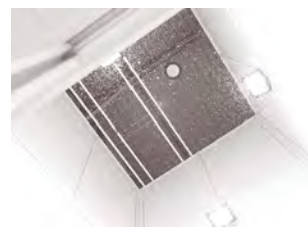

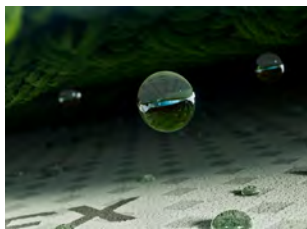

# RESPONSIBLE PERFORMANCE

## GORE-TEX ePE

We're on a journey to reduce the amount of fluorocarbons in our products, but we can't do it alone. We need our partners to help us on that journey.

GORE-TEX's ePE membrane technology is a new complimentary GORE-TEX material produced without fluorocarbons. Data shows that these new membranes have a lower carbon impact\* than their predecessors, while offering comparable performance, still Guaranteed to Keep You Dry.

Find ePE membranes in our new Khroma Converge Jacket and Pants, the Namche GTX Jacket and all our waterproof GORE-TEX gloves.

\*Through the laminates innovative membrane and select textiles (per Higg MSI)

QFG-25 / QFG-26

# KHROMA TOUR PANTS

The Sales Pitch:

Our first ski pants tailored specifically for spring touring, the Khroma Tour Pants are built for skin tracks in milder temperatures.

Lightweight and low bulk, they deliver the freedom of movement needed to negotiate kick turns and long, challenging ascents, with a slimmer fit and breathable fabric combination that allows heat and moisture to escape.

They also provide an opportunity to extend the length of the Khroma season into the warmer spring months.

## Built for spring on the skin track

### FEATURES / BENEFITS:

BELLOWED POCKETS ARE SPACIOUS AND ALLOW UNRESTRICTED STRIDES

ACCESS BOOTS EASILY WITH THE FULLY OPENING ANKLE ZIP

COMPATIBLE WITH A RANGE OF BOOT CUFF SIZES THANKS TO THE SNAP ADJUSTMENT AT HEM

SIMPLE YET ADJUSTABLE WAIST-BAND IS COMFORTABLE AND LIGHTWEIGHT

DURABLE MATRIX™ FABRIC DEFLECTS SNOW AND WIND WHILE BREATHING ON THE ASCENT

KICKER PATCHES ARE STRATEGICALLY SIZED AND POSITIONED TO REDUCE BULK WHILE OFFERING PROTECTION

SEAL OUT SNOW WITH THE STRETCHY INTERNAL GAITERS
